5 KEY BUSINESS BUILDING STRATEGIES TO ACHIEVE FINANCIAL SUCCESS

- 1. Increase the number of customers and keep existing customers (of the type you want)**
 - Do not ignore your existing customers. Take care of your existing customers as they are a significant asset to your business.
 - Winning new customers is a front end activity. It is the face of your business and it is important that new customers receive the right experience.
 - Remember, you cannot be all things to all customers – pick your customer.
 - Remember the Pareto Principle whereby 80% of your revenue comes from 20% of your customers.
- 2. Increase the number of times customers come back.**
 - Encourage customers to buy services from you more often
 - It costs 6 times more to win a new customer than it does to service an existing client more often
 - Acknowledge that servicing loyal customers has a compound effect on growth
 - Utilise your existing customer database rather than cold canvassing
 - It is the little things you do that will keep your customers loyalty
- 3. Increase the average value of each sale.**
 - Ensure customers are aware of all the services you can offer
 - Customers come to you for assistance and guidance
 - Ensure you consider cross selling, up selling and bundling goods and services
 - The key is not to discount as this will affect profit margin and ultimately, cash
- 4. Increase the effectiveness of each process in the business**
 - Remember the business cliché – Work on your business rather than Work in your business
 - Without working on the effectiveness of your business the implementation of the other 3 keys areas is difficult
 - Systemise everything you do – remember business is about a collection of related, structured activities that produce a specific service or product
 - Systemising ensures speed, accuracy and low costs
- 5. Build a committed Team**
 - Together everyone achieves more (Team)
 - Your Team needs to be committed
 - Your Team is the biggest asset of your business
 - It is your Team that develops and nurtures the relationships with your customers and potential customers
